

# Unit 1A – An introduction to modelling.

## **Level 1**

Pupils follow the teacher's instructions when undertaking tasks. They explore different types of information held on ICT systems. They use ICT to move objects on screen for a defined purpose and use words and pictures to communicate ideas. They are aware of ICT in their world.

## **Teacher commentary:**

The PC and whiteboard were used for this task. The children used Simple City Farm to create their farm picture. They could drag the animals into the picture and place them where they wanted them. When happy with the picture I asked, how many animals: cows, pigs etc were in their farm. The children had to drag the appropriate number into the picture, spell cat, pig, duck etc by dragging the letters into place. When they finished they were asked to print their picture.
